

Anesoft

Anesthesia & Critical Care Software
1 Montpellier Laguna Niguel, CA 92677 USA

Dear Anesoft Customer,

Thank you for purchasing the Anesoft **Pediatrics Bundle 2016**. We hope you enjoy the simulated cases.

The package includes three programs –PALS Simulator to practice pediatric megacode management, Pediatrics Simulator to practice pediatric critical care management, and Neonatal Simulator to rehearse neonatal resuscitation. PALS Simulator runs in your browser. Pediatrics Simulator and Neonatal Simulator are Windows applications.

Single License Instructions for Windows

1. If you are installing from a CD, copy the Peds Bundle 2016 folder to your desktop. Skip to step 3
2. If you are installing from the download, SAVE the download file pedsBundle2016.zip to your desktop. Close all applications and right-click the PedsBundle2016.zip icon on your desktop. Under the Zip options select 'Extract to folder \Desktop\ PedsBundle2016'.
3. To run the PALS Simulator, open the PALS Sim 2016 folder in the Peds Bundle 2016 folder, then double-click the file index.html to launch the PALS Simulator in your default browser.
4. To run Pediatrics Simulator, open the Pediatrics Sim folder in the Peds Bundle 2016 folder, then double-click the application Pediatrics Simulator 3.exe.
5. To run Neonatal Simulator, open the Neonatal Sim folder in the Peds Bundle 2016 folder, then double-click application Neonatal Simulator 2.exe.

The best way to learn to use these programs is to run the first case in each program. These cases include very detailed instructions, one step at a time to resuscitate the patient. Select Case Help > What Now? repeatedly during the simulation. The help will walk you through the entire resuscitation.

Please email us at jill@anesoft.com if you need further assistance.

Best regards,

Jill, Anesoft Customer Service
