---

Dear Anesoft Customer,

Thank you for purchasing the Anesoft **Resuscitation Bundle 2016**. We hope you enjoy the simulated cases.

The package includes three programs – ACLS Simulator to practice adult megacode management, PALS Simulator to practice pediatric megacode management, and Neonatal Simulator to rehearse neonatal resuscitation. ACLS Simulator and PALS Simulator run in your browser. Neonatal Simulator is a Windows applications.

## Single License Instructions for Windows

1. SAVE the download file ResusBundle2016.zip to your desktop.
2. Close all applications and right-click the ResusBundle2016.zip icon on your desktop. Under the Zip options select 'Unzip to folder \Desktop\ ResusBundle2016'.
3. To run the ACLS Simulator, open the ACLS Sim folder in the Resus Bundle folder, then double-click the file index.html to launch the ACLS Simulator in your default browser.
4. To run the PALS Simulator, open the PALS Sim folder in the Resus Bundle folder, then double-click the file index.html to launch the PALS Simulator in your default browser.
5. To run Neonatal Simulator, open the Neonatal Sim folder in the Resus Bundle folder, then double-click application Neonatal Simulator 2.exe.

The best way to learn to use these programs is to run the first case in each program. These cases include very detailed instructions, one step at a time to resuscitate the patient. Select Case Help > What Now? repeatedly during the simulation. The help will walk you through the entire resuscitation.

Please email us at [jill@anesoft.com](mailto:jill@anesoft.com) if you need further assistance.

Best regards,

Jill, Anesoft Customer Service
